

Instructions

1. Put each team number in the first column before judging begins
2. Rank teams constantly throughout the day, adjusting as needed
3. If you think a team should be considered for an award in any area, circle their ranking in that area

Example:

Team #	Project Rank	Core Values Rank	Robot Design Rank	Comments
1234	4	②	6	Well researched project about communication between astronauts and people on Earth. Took turns helping teammates participate!

This team would have an average project, great core values, and poor robot design. You think they should be considered for a Core Values award.

IMPORTANT:

Please do not let teams see this sheet. Rankings are never published to teams.

****One sheet per room****

Use this area for additional notes as needed.
